Dataset Name: RGB-Event ISP Benchmark Dataset Authors: Yunfan LU et al. Institution: Hong Kong University of Science and Technology (Guangzhou) Partner: AlpsenTek Co., Ltd.

Version: 1.0 Date: [2025-03-02]

1. License Grant

The dataset is provided free of charge for **non-commercial research and educational purposes only**. By downloading or using this dataset, you agree to the terms below.

2. Permitted Usage

You are permitted to: - Use the dataset for academic research and educational purposes; - Publish results based on this dataset, **provided proper citation is given** (see Section 5); - Share derived results (e.g., trained models or visualizations), **but not the raw dataset**.

3. Prohibited Usage

You may NOT: - Use the dataset for commercial purposes (including but not limited to product development, industrial training, or monetization); - Redistribute, sublicense, or share the dataset in whole or in part; - Use the dataset to train models that will be used in commercial applications.

4. Access Control

The dataset is released under **review and approval**. Unauthorized access or distribution may result in legal consequences. If you are not granted permission to use the dataset, you must delete all copies.

5. Citation Requirement

All publications or derived works using this dataset must cite the following paper:

Y. Lu, et al. “RGB-Event ISP Benchmark and Joint Image Reconstruction for Hybrid Sensors”, ICLR 2025.
